

WHAT YOU NEED TO KNOW:
NAVIGATING NAVITA™ & THE REVISED USCG MEDICAL CERTIFICATION PROCESS

BE PREPARED WITH PRIME OCCUPATIONAL MEDICINE

INTRODUCING NAVITA™

The U.S. Coast Guard has launched Navita™, a new digital platform that Merchant Mariners will use to complete credentialing applications and submit required documentation.

With this new platform, employees who require a certified U.S. Coast Guard Medical Certificate should begin the process through Navita™ and bring the system-generated medical examination form with them to their appointment.

NEED A COAST GUARD EXAM BUT NOT OFFICIAL CERTIFICATION THROUGH THE COAST GUARD?

If your company requires an occupational physical based on U.S. Coast Guard medical standards, but the employee is **not** applying for a U.S. Coast Guard Medical Certificate, Prime can continue to perform the physical using the applicable Coast Guard standards and existing occupational health process.

YOUR NEW PROCESS FOR COAST GUARD MEDICAL CERTIFICATION

If you or your employees require U.S. Coast Guard Medical Certificates, please follow the process below when planning your clinic appointment.

Begin the application process through the Navita™ Mariner Portal. The required examination form will depend on the endorsement or rating for which the mariner is applying.

ACCESS THE PORTAL AT navita.uscg.mil/s/

After completing the required online sections, **download and print the medical examination form** generated through Navita™.

Bring the generated form to the medical provider for the required examination.

The medical provider will complete and sign the appropriate sections of the form.

Return to the Navita™ portal to **upload the completed and signed medical examination form** and continue the application process.

PRIME OCCUPATIONAL MEDICINE
